DETAILED ACTION

This application is a continuation of PCT/EP99/08598 International Filing Date: 11/09/1999, which claims priority to EPO 98 12 1338.2. It is noted that the certified copy of the priority documents have not been received.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 2-4 and 7-10 drawn to a method of treating an addictive disease herein comprising specific components herein, classified in class 514, subclass 169 for example.
- II. Claims 5-6 and 11 drawn to a pharmaceutical composition comprising specific components herein, classified in class 514, subclass 169 for example.

Inventions Group I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, for example, a substitution treatment may be used in the instant claimed method of treating an addictive disease herein.

Application/Control Number: 09/851,817

Art Unit: 1617

The search for all inventions would place an undue burden on the Office in view of the diversity of the medical disorders to be treated and the corresponding diversity in the field of search for each.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Election of Species

This application contains claims directed to the following patentably distinct species of the claimed invention: corticosteroids.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of

- 1) a single specific disease or condition to be treated; and
- 2) a single specific composition comprising a specified individual active compounds to be employed in the treatment of the elected single specific disease or condition

for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 2-11 are generic to a plurality of disclosed patentably distinct species and diseases to be treated. The claims read on the employment of various compounds e.g., corticosteroids, with diversity of chemical structure, the search for all of which presents an undue burden on the Office. It is noted that a reference to one combination of individual agents would not be a reference to another combination of individual agents under 35 U.S.C.103.

Art Unit: 1617

A "specie" is a specific compound or treatment, with all parameters and/or substituent variables FULLY accounted for.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P Sec. 812.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Jiang, whose telephone number is (703) 305-1008. The examiner can normally be reached on Monday-Friday from 9:00 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minna Moezie, J.D., can be reached on (703) 308-4612. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-1235.
